

# PORTLAND STONE WARE CO.

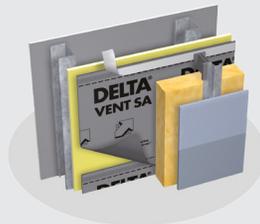

DELTA® products have the longevity, quality, and technology that are desired in the building industry today. The wide range of air and moisture barriers for both above and below-grade applications are suitable for the level of performance you need. Although Portland Stone Ware has access to the complete DELTA® product lines, we stock Above Grade and Below Grade products.

## Above Grade - Products In Stock

### High Performing Air & Water Resistive Barriers

**DELTA®-FASSADE S**  
A UV stable water-resistive barrier with high vapor permeability for open joint cladding.

**DELTA®-VENT SA**  
The only self-adhering air and water-resistive barrier with the security of a self-adhesive edge lap.

### Dimple Rainscreen

**DELTA®-DRY**  
A versatile, ventilated rainscreen ideal for use under absorptive claddings.

**DELTA®-DRY STUCCO & STONE**  
A ventilated rainscreen with a factory pre-installed mortar screen specially designed for use behind stone and stucco cladding.

# Below Grade - Products In Stock

## Waterproofing Foundation

### DELTA®-MS

Get moisture protection you can count on. Our dimpled membrane with its exclusive Air-gap Technology keeps building dry and protected for years.

### DELTA®-DRAIN

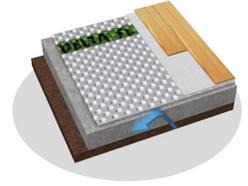

A drainboard with high compressive strength and impact resistance that controls the flow of below-grade water.

### DELTA®-FOOTING BARRIER

A 3-ply sheet membrane that resists the capillary wicking of water and upward migration of moisture from the footings into the foundation wall - also known as rising damp.

## Moisture Protection For Basement Floors

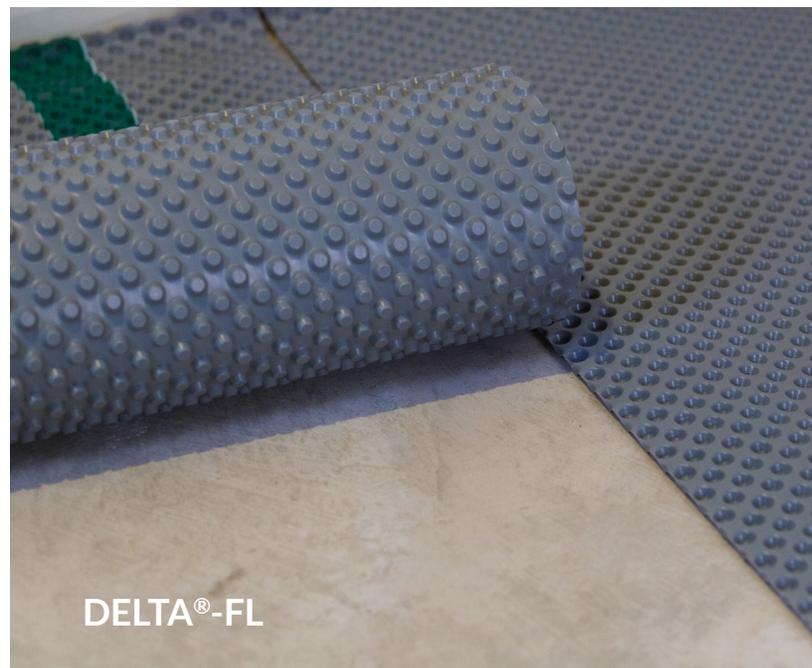

### DELTA®-FL

A dimpled, heavy-duty, gray air gap membrane for concrete and slab-on-grade floors.

DELTA®-MS

DELTA®-FL
