Instructions

Introduction: The purposes of the follow-up plant inspection are to verify that the product being produced is consistent with the product used in the qualifying tests and recognized in the ICC-ES evaluation report or listing; that the documented quality system continues to meet ICC-ES requirements; and that the quality system is effectively implemented.

The Plant Inspection: The inspector should verify that documents and processes (including the current quality documentation) observed at the listee or report holder's facility during the inspection are consistent with the information provided by ICC-ES. A simple check in the Yes/No boxes may not suffice; if needed, use the comments sections or use an attached document for your remarks or explanations. The inspector should, to the extent possible, inspect the product recognized in the ICC-ES evaluation report or listing to assess conformance to specifications as described in the ICC-ES evaluation report or listing and ICC-ES supporting documents. Additionally, the inspector must use the ICC-ES supporting documents, the manufacturer's current quality documentation and operating procedures, and the manufacturing process records, to evaluate the implementation and effectiveness of the facility's quality management system. If there are questions regarding which documents to verify, please contact ICC-ES (inspections@icc-es.org).

The Report: The inspector will complete this report during the inspection. If there is a nonconformity, the nonconformity will be detailed in the inspection report, and a Corrective Action Request (CAR) will be issued. CARs must clearly state what is required by the ICC-ES Acceptance Criteria for Quality Documentation (AC10) and by the manufacturer's documented quality system, and what the inspector actually found. This Follow-up Inspection Report must be signed by the manufacturer's representative and by the inspector. A copy of this report, and any CARs, must be given to the manufacturer's representative (and/or the report holder or listee, if the manufacturer and the report holder or listee are different) at the conclusion of the inspection, and a copy must be forwarded to ICC-ES.

Resolution of CARS: The manufacturer must respond to each CAR within 30 days of the inspection. CARs must be resolved by the manufacturer (or the report holder or listee, if the manufacturer and the report holder or listee are different) to the satisfaction of ICC-ES. ICC-ES reserves the right to require another follow-up inspection, to confirm corrective actions, when deemed necessary.

REVIEW OF NONCONFORMANCE(S) FROM PREVIOUS INSPECTION

Reviewed effectiveness of correction plan for nonconformance(s) issued during previous inspection?	Yes ⊠	No
Is the implementation of the resolution(s) satisfactory?	Yes ⊠	No
Is additional follow-up required? (please provide a comment if additional follow-up is required)	Yes	No ⊠
Comments: No CARs		

PART A – PRODUCT VERIFICATION

1.	Are the manufacturer's quality manual and operating procedures consistent with the quality documentation submitted to ICC-ES? Note any discrepancies and provide applicable copies.			No	
Com	ments: Reviewed Quality Control Manual - Portland Columns - 93.36.02 dated 7/18/2019		·		
2.	Are the manufacturer's documented procedures, for inspection or testing of incoming materials, being carried out? Are the procedures consistent with the quality documents submitted to ICC-ES?	Voc		No No	
	ments: QCM Sect. 2.2, reviewed mill certs on steel and on cement mix, visually inspect co tially reject. Dragon Mill Test Results dated 4/2019 reviewed	lumn ste	el and		
	Is this manufacturer conducting inspections and tests, as required in the quality documentation, for in-process quality control? Are these inspections and tests sufficient to ensure consistency of product quality? Are the procedures and tests consistent with what is described in the quality documents submitted to ICC-ES? ments: Concrete batching process alarms based on out of spec weights of materials; const nts mix variation. Biannual concrete strength testing by independent company. Is the manufacturer conducting final inspections and tests, prior to final approval and labeling of the finished product? Do these inspections or tests ensure that the product receiving the label complies with	Yes Yes Yes Ant batc Yes Yes	T	N/A Ia No No	
the applicable specifications and design values? Comments: Final visual inspection during painting and labeling.					
5.	Using the identification that is applied to the finished product, conduct a traceability study by taking a finished product and tracing it back to the production and quality control records. Is the traceability adequate?			No	
Comments: Each column label contains mfg. date - traceable to Column Production Form and Dragon mill test results and cylinder tests and certs from steel shipment.

6a.	Does this facility presently label product for private label listees?	Yes	No ⊠	
	If yes, please complete Section 6b.	Ш	\boxtimes	
6b.	List the name of each private label listee for which there is labeling with the ICC-ES report (A list of authorized listees appears below the report holder's name on the evaluation report)	number and	or mark.	
Comments:				
	Is the product labeling consistent with what is described in the quality documentation	Yes ⊠	No	
6c.	Is the product labeling consistent with what is described in the "Identification" section of the evaluation report or listing? (Verify that these guidelines apply to all products labeled with the ICC-ES report number or mark.)	Yes ⊠	No	
Comments: Listing, QCM Sect. 2.1.4, matches label on completed product.				

PART B – QUALITY SYSTEM VERIFICATION

AC10 Section	AC10 REQUIREMENTS	QUALITY S IMPLEME	_	
2.1.2	Is the facility street address, telephone number and contact person, as noted in the documentation, correct?	Yes ⊠	No	
Comment	s: QCM Page 1, production of columns now at 10 McGrath Road, Methuen, MA - se	ee summary		
2.1.3	Is the manufacturer reviewing the quality system documentation a minimum of once every two (2) years? Is there a revision log included in the quality documentation that is kept current and dated? (If the date of the quality documentation provided by ICC-ES for the follow-up inspection is different from the date of the quality documentation at the manufacturing plant, or if revisions have been made to the quality documentation, please provide to ICC-ES a copy of the revision record with an explanation of the changes that were made.)	Yes ⊠ Yes ⊠	No No	
Comment	s: Review Log - last change 7/18/19, change production location, review and update	personnel		
2.1.6	Is the product flowchart or the description of production methods, as contained in the manufacturer's quality documentation, representative of the actual production flow and process?	Yes	No	
Comments: QCM, Sect. 2.1.6				
2.1.7	ICC-ES must be notified of any significant product changes so that those changes may be evaluated and documented. Does the quality documentation have procedures to notify ICC-ES and other appropriate parties of any product changes? Has the product changed significantly since the last inspection? If yes, describe the change in the comments section below.	Yes ⊠ Yes □	No □ No ⊠	
Comments: QCM, Sect. 2.1.7				

Form Q-24 Inspection Report

Page 5 of 6

2.1.8	Is the organizational chart up-to-date, and are the duties and responsibilities of key positions in the quality program identified?	Yes ⊠	No		
Comment	s: QCM, Sect. 2.1.8				
2.1.9	Are the products packaged and stored per the manufacturer's quality documentation and operating procedures?	Yes ⊠	No		
Comments	s: QCM, Sect. 2.1.9				
	Are records of all significant complaints about the product being kept?	Yes ⊠	No		
2.1.10	Is appropriate action being taken with respect to such complaints?	Yes ⊠	No		
	Are the actions being documented?	Yes ⊠	No		
Comment	s: QCM, Sect. 2.1.10				
2.5	Are nonconforming materials segregated from conforming materials as directed in this manufacturer's quality manual and operating procedures?	Yes ⊠	No		
Comment	s: QCM, Sect. 2.5				
2.6.1	Does the manufacturer maintain a list that includes all the critical measuring and test equipment?	Yes ⊠	No		
	Does the equipment identified on this list have current calibration records?	Yes ⊠	No		
Comments: Easy Touch Scale calibration due 6/2020, Worcestor Scale #49137, certificate ties to NIST					
2.7.1	2.7.1 Is the manufacturer actually using the forms, checklists and reports identified in the manufacturer's quality documentation to record manufacturing and quality process metrics?				
Comment	s: Use Columns Production Form for documenting manufacture of columns. Reviewe	ed recent forr	ns.		
2.7.2	Are the quality records as noted in item 2.7.1, above (forms, checklists and reports), approved by responsible personnel as required by the manufacturer's quality documentation?	Yes ⊠	No		
Comments:					
2.7.3	Are all manufacturing and quality records maintained for a minimum of two years? (Examples are reports resulting from the manufacturer's own tests and inspections.)				
Comments: maintained a minimum of 2 years					

Summary of the Inspection

Inspector should note general observations on the manufacturer's quality system, facility and product manufacturing process. (Include details as appropriate.)

Personnel were very cooperative during inspection. Records were available for review. Toured new production facility.

Production of columns moved to recently constructed building down the road at 10 McGrath Road, Methuen, MA-Business office still at 50 McGrath Road, Dracut, MA - Portland notified ICC-ES of move.

CORRECTIVE ACTION REQUESTS (CARs)

Findings should be entered in the blocks provided below, and defined as falling into one of four categories:

- Major CAR A major nonconformity (e.g., change of key raw materials, significantly different manufacturing process, different final product specifications) that must be resolved to the satisfaction of the ICC-ES technical staff.
- Minor CAR A relatively minor nonconformity (e.g., equipment out of calibration, changes to forms, inadequately trained personnel) that can be resolved to the satisfaction of the inspector, in most cases, without much difficulty.
- Concern A weakness in the quality system that needs to be corrected to head off the possibility of future CARs.
- **Comment** A suggestion for improvement.

CARs must be addressed within 30 days of the inspection. The manufacturer or report holder should respond with a written report on the corrective actions taken, and objective evidence of the action. Objective evidence could be in the form of revised documents, new documents, photographs, etc.

Findings (check the category, and describe the details of the finding. Use a separate sheet if necessary):

Tindings (shook the sategory, and associate the astane of the finding social coparate chook in hosessary).
